

CASE: CLASSROOMS

Just as it did in 1847, today's learning begins in the classroom. While the dynamic between student and teacher remains central to the learning process, the class environment plays a large role in facilitating that dynamic. With this in mind, Jesuit will continue to employ a prudent approach to adopting new technology as it looks to complete renovations to its classrooms. Simply put, the Jesuit curriculum dictates the technological needs, not the other way around.

Multi-media instruction platforms in each renovated classroom offer teachers new ways of captivating the imaginations of their students. These improvements better equip teachers to meet today's students where they are, using enhanced auditory and visual means of engaging each student according to his style of learning.

Lighting improvements, new desks, and the addition of raised platforms in the front of each classroom help teachers maximize student potential in a 21st century learning environment. Selected classrooms will also be outfitted for instruction in the arts.

**170
YEARS**

Jesuit has been educating young men in New Orleans for more than 170 years.

**1000
BLUE JAYS**

In the last 30 years, more than 1000 Blue Jays were honored as National Merit Semifinalists.

“The renovation of classrooms fits into a larger effort to empower our teachers with the resources they need to constantly improve learning standards at Jesuit. Technological improvements supplement comprehensive programs for professional development, covering both research-based instructional strategies and foundational principles of Ignatian pedagogy.” —Peter Kernion '90, principal

32 CLASSROOMS

Thirty-two classrooms
will be renovated.
